

# COVID-19 (coronavirus)

## PPE advice for health and social care workers in community/primary care

Standard precautions apply when caring for a person **without** symptoms.

Additional precautions should be taken in the situations below:

1. Within 1 metre of a person with symptoms of COVID-19 (ie fever and/or new continuous cough) or a confirmed diagnosis of COVID-19.

**Note:** Risk assess: use eye protection if at risk from splashing

Fluid  
resistant  
fluid  
shield  
mask

Plastic  
apron

Disposable  
gloves  
(single use)

2. Where you need to carry out **Aerosol generating procedures\*** on a person with symptoms of COVID-19

FFP3  
respirator  
mask

Disposable  
gloves  
(single use)

Eye  
protection

Long sleeve  
disposable  
gown

### \*These include:

- Open suction
- Non-invasive ventilation
- Manual ventilation
- Intubation / Extubation
- Tracheostomy procedures

This does not include NEBULISERS
